BMW 7 Series BMW 6 Series BMW 5 Series BMW 3 Series BMW 74	1 2 3 5
BMW M models	7
Product overview Technology guide	9

The top level of achievement is the one you define yourself. After all, true individuality is an art. It fulfils the highest demands – the ones you make of yourself. BMW Individual enables you to satisfy these demands. With cars whose unique character precisely matches your personal preferences, and a choice of exclusive equipment combinations where all details perfectly complement each other. And that is why we say that the top level of achievement is synonymous with the most exclusive way to drive a BMW.

How to embark on a voyage in style. The maritime atmosphere on board this BMW Individual 7 Series is created by the Mahogany wood trim, featuring horizontal maple inserts inspired by classic yacht design. The BMW Individual Merino leather in Champagne adds a bright and airy dimension. And the BMW Individual leather steering wheel with wood ring insert is the invitation for you to captain this craft. A further maritime accent is provided by the velour floor mats in Anthracite.

**Surfing the Internet: BMW Individual Rear Seat Infotainment Online** is the innovative Internet system for rear-seat passengers. Two 9.5" LCD monitors integrated into the front seat backrests provide access to a full range of multimedia services, including TV reception and DVD playback, with unlimited Internet access while on the move.

**Front-row seats in the rear: the BMW Individual Rear Seat Infotainment system** consists of two 6.5" LCD monitors attached to the front seat backrests. This enables TV reception on the move, as well as DVD playback in 16:9 format. Control centre functions are shown on the monitors. Audio quality is simply superb.

**Optimum illumination in the rear is ensured by BMW Individual reading lights.** These lights have the advantage of being adjustable – you can direct the light at the precise spot you want. Their superior brightness and large light cone enable relaxed working, reading and writing.

BMW Individual centre console with fold-out table and bar compartment: contains two glasses, a paper napkin dispenser and a storage bowl.

BMW Individual centre console with table and storage BMW Individual centre console with two tables: **compartment:** for storing a notebook or A4 documents. allowing you to work in comfort using your laptop.

The centre console with Piano Finish Black trim and control panels harmonises perfectly with the BMW Individual interior trim in Piano Finish Black. The armrest features BMW Individual Merino leather. The centre console is only available in conjunction with the optional electrically adjustable rear comfort seats.

The BMW Individual centre console with table and multifunctional communication unit maximises your freedom. It enables professional office communications from within your BMW Individual, courtesy of the all-in-one fax, printer, scanner and copier. It also includes an interface to connect your laptop. The integrated dual-band GSM module, modem and SMS function establish the necessary connections. This version is also available without table.

**Harmony is measured on a very fine scale.** It's very meticulous work when our designers develop BMW Individual equipment. Down to the smallest fraction of an inch, nothing is left to chance. The full leather upholstery in Polar Grey BMW Individual Merino leather and the Anthracite roof liner in Alcantara with its elegant suede look emphasise the exclusivity of the interior.

**Harmony arises when all the intermediate tones are right.** Somewhere between black and white there is the perfect grey. And the same harmony is also apparent in the way the leather combines with the BMW Individual interior trim in Piano Finish Black, a high-gloss surface that is usually only found on the world's leading pianos.

**Enjoyment is a question of character.** Much like the most famous sparkling wine in the world, the BMW Individual Merino leather in Champagne owes its superior quality to careful selection and processing. The result is a leather which, like Champagne, has great depth of character. Its elegant hue perfectly complements the leather's natural look.

If you want the best out of them, first you have to give them something. In this case, lots of time to ripen. Amarone grapes are dried for months before they are made into wine. It is this exceptional process that creates the intense character of this wine. The BMW Individual interior trim in Walnut Amarone undergoes a similarly lengthy and sophisticated production process. Only trunk wood with perfect line markings is used. Its brown hue gains additional appeal from a deep, dark red shimmer.

**Natural exclusivity.** In the interior of the BMW Individual 5 Series, exclusive materials complement each other. Thanks to very gentle processing, our Merino leather retains its porous structure. So the velvety look is matched by an equally velvety feel. Here, the light Platinum leather harmonises with the elegant, suede-like look of the BMW Individual roof liner in Platinum Alcantara. The BMW Individual Walnut Amarone interior trim completes the picture.

**Excellent view in the rear: the BMW Individual DVD System.** Two high-resolution 6.5" monitors enable rear-seat passengers to watch DVD films in 16:9 format. Camcorder, digital camera or games console devices up to 12 V can be connected via the AUX port. The vibration-resistant DVD changer is located in the boot. Two headphones ensure superior audio quality. The system is controlled via the monitors or the remote control unit.

## Live in concert: the BMW Individual High-End Audio System. A first-class concert requires two things – a virtuoso musical performance, and superb interior acoustics. That's what our engineers have worked hard to ensure. First, it presupposes an exact knowledge of the interior features of the BMW Individual 5 Series. Then the signal processing of our High-End Audio System is exactly matched to these features. Finally, DIRAC technology and speed-dependent equalizing reduce undesired noise in the interior. So the enjoyment of music becomes a pure,

unadulterated pleasure.

An optimised soundscape is a question of geometry. A perfect audio sound depends on the arrangement of loudspeakers in the interior. Together with the central speaker, two tweeters and two mid-range speakers in the front loudspeaker system form the basis of the in-car soundscape. The system comprises eleven further loudspeakers with lots of power and tough membranes.

Polished elegance: the moonstone develops its unique sheen thanks to a special cut. This creates the special reflections near the surface which give this gem its three-dimensional colour depth. The pigments in the BMW Individual Moonstone metallic paint finish are equally subtle. They, too, create a veritable kaleidoscope of colours under the influence of changing light conditions, lending the BMW Individual 5 Series Touring an air of polished elegance.

**Style means getting your colours and materials just right.** Our Merino leather in Syrah Blue is complemented to perfection by the BMW Individual trim in Piano Finish Black. Its high-gloss surface is the result of a special manufacturing process. The elegant suede look of the Alcantara Anthracite roof liner ties in nicely with the velvety surface of the leather.

**Perfection in every detail:** the full leather upholstery in the BMW Individual 5 Series. It features a much larger number of leather elements than the standard version. For example, Merino leather is also used on the backs of the front seat backrests, the lower part of the instrument panel and on the all-leather door trim panels.

**The crystal-clear sheen of aventurine.** Crystalline inclusions lend aventurine its remarkable shimmer. These minute crystals cause dot-like light reflections – an effect known as "aventurescence", which can now also be created in the manufacture of exclusive paint finishes. A new pigment in the Aventurine Silver metallic paint finish creates a silver sheen that can change into a very subtle chrome green.

Powerful concentration of colours: The BMW Individual Merino leather in Syrah Blue owes its name to one of the best red wines in the world. It was the very dark Syrah grapes, and the complexity of the wine produced from them, that our designers took their main inspiration from. It is precisely this hue that lends the interior of the BMW Individual 3 Series Sedan its powerful visual appeal. This effect is supported by the BMW Individual interior trim in Piano Finish Black.

A sign of expert craftsmanship: The saddle stitch finish is usually reserved for high-quality garments, for example the lapels of men's jackets. In the BMW Individual Merino leather in Syrah Blue, the colour of the stitches is a bluish grey, which makes for an elegant contrast.

The most natural way to display a sense of exclusivity. A gentle refinement process ensures that the BMW Individual Merino leather remains exceptionally soft and supple. The Champagne colour shown here, like the sparkling wine of the same name, displays a very fine structure. And the elegant Champagne hue shows off the surface of the leather, with its natural grain and structure, to perfection.

**Classic extravaganza.** What makes our classic Birch Anthracite wood trim so extravagant is the unique structure of its grain. "Flamed" birch can only be harvested at certain times of the year, from rare trees growing in the far North. Its anthracite hues create a striking contrast with the BMW Individual Merino leather in Champagne.

The search for perfection is over. Platinum, in its purest form, is exceedingly rare. Just like our Merino leather, which requires a painstaking selection of raw materials: by choosing only the most immaculate skins, we can do away with the usual post-processing of the leather. Which means that its natural grain and open-pored structure are preserved.

**Elegant markings.** It is the wavy grain which makes the BMW Individual Maple wood so inimitable. The shell-like texture of the wood is caused by the light refracting at different angles. The Anthracite colour keeps this effect subtly in the background, creating an elegant contrast with the BMW Individual Merino leather in Platinum.

A new type of temperature control for open-top driving. This version of our Merino leather has a very useful property: it heats up less in the sun. This is thanks to SunReflective Technology, which reflects a part of the sunlight that conventional leather absorbs. The natural look and feel of the leather remains totally unaffected by this, as demonstrated here by the BMW Individual Merino leather in Cohiba Brown. As with the world-famous "Cohiba" cigar, its unique quality is based on painstaking selection and processing.

**Unmistakable through and through.** The elegant markings running perpendicular to the grain are what makes our interior trim in Figured Eucalyptus Red Brown – and thus the entire interior of your BMW Individual 3 Series Convertible – so unique.

**So familiar and yet a mystery:** Just like the process of caramelisation has not yet been fully explained, our designers do not want to give away all the secrets that go into making our Caramel colour. Just this much: the colour pigments need to be balanced very precisely in order to achieve the delicious hue that is used in the BMW Individual Z4 Coupé with extended Walknappa leather upholstery.

**Concentrating on the essential starts with the details:** In the BMW Individual Z4 Coupé shown here, elegant Caramel is also used for the interior trim, where it underscores the horizontal orientation of the interior. These dynamic lines and surfaces reinforce the sporty character of the coupé.

**Pure dynamism.** The BMW Individual Z4 Roadster's low, broad front lends the car a crouching stance, as if it were ready to pounce. In the interior, the high-gloss BMW Individual Piano Finish Black trim subtly accentuates the car's sporty personality. In this way, the interior trim provides an elegant interpretation of the Roadster's dynamic design language.

**Colours shape surfaces.** The BMW Individual Walknappa leather in Champagne conveys a generous sense of space and elegance. This impression is underscored by the extended leather trim, with the centre console, door trim inserts and roll bars finished in leather.

**Refined power.** The BMW Individual paint finish in Ruby Black metallic lends the surface of this BMW Individual M6 Coupé its powerful depth. This effect is achieved by special pigmentation that creates an elegant light effect resembling the silky sheen of a ruby.

**A trinity of colours.** The BMW Individual interior trim in Walnut Amarone contributes a deep brown whose red shimmer harmonises perfectly with the Ruby Black metallic paint finish. The BMW Individual Merino leather in Oxide Brown completes the picture.

A three-dimensional surface. Moonstone owes its unique shimmer to a special cut which creates the reflections that are responsible for this gemstone's unique look. The BMW Individual Moonstone metallic paint finish likewise requires a very sophisticated layering process to endow the surfaces of the BMW Individual M6 Convertible with their three-dimensional colour depth.

**Powerful contrasts.** The complex hue of the BMW Individual Merino leather with SunReflective Technology in Syrah Blue underscores the powerful looks of the BMW Individual M6 Convertible. Combined with the high-gloss Piano Finish Black interior trim, the resulting interior creates an elegant contrast with the Moonstone metallic paint finish.

Understatement has rarely been so powerful. The character of the BMW Individual Ruby Black metallic paint finish perfectly matches that of the BMW Individual M5. Its passion is modestly restrained. But as soon as the BMW Individual M5 gathers speed, and the light angles change, a powerful ruby-red shimmer appears under the surface, emphasising the power of the world's sportiest sedan.

**Opposites attract.** Just like the world-famous sparkling wine, our Merino leather in Champagne is an expression of cultural refinement. It makes for a bright, spacious and welcoming interior, which is enhanced further by the generous leather trim on the centre console and doors. Combined with the Piano Finish Black interior trim, it makes for a delightful and magical contrast.

A brilliant way of showing character. A sophisticated process lends diopside a brilliant dark green colouration that is in now way inferior to emerald. It is the same with the BMW Individual Diopside Black metallic paint finish. Here, too, emerald hues rise from the depth, creating a three-dimensional iridescent effect.

**Natural grace is a question of strength.** The increased thickness of the material is what lends the BMW Individual Merino leather its unique structure. Gentle tanning methods and a special vat immersion pigmentation process ensure a natural look and a soft and supple feel. The Platinum colour only serves to reinforce this impression, visually emphasising the velvetiness of the leather. The BMW Individual Piano Finish Black interior trim perfectly complements this look.

BMW M5 Touring is not available in Australia.

**Top quality has many facets.** The play of colours in the special BMW M Carbon Black metallic paint finish is as complex as the structure of carbon itself. The elegant black changes into a very dark blue, highlighting the multifaceted exterior design of the BMW Individual Z4 M Coupé by making its surfaces, joins and creases look even more distinctive.

**Tradition meets innovation.** In Imola, racing tradition and innovation come together as they do nowhere else in the world. A similar meeting also happens in the interior of the BMW Individual Z4 M Coupé, with high-quality New England leather in Imola Red and Anthracite underscoring the interior design's sporting credentials.

**Roadster colour with a majestic effect.** Just as the ruby is known as the king of gemstones, our Ruby Black metallic paint finish seems to lend the BMW Individual Z4 M Roadster a regal quality. The deep Anthracite, which in the sun develops a golden red luminosity, brings out the multifaceted shapes of the BMW Individual Z4 M Roadster to perfection.

Uniqueness is a question of substance. The unique character of Amarone wine is based on its lengthy production process. It also expresses itself in the wine's dark, ruby-red colour. The same intense hue defines the BMW Individual Walknappa leather in Amarone. It lends the interior a powerful depth, which is underscored by the elegant BMW Individual Piano Finish Black interior trim.

**BMW Individual** Compositions

BMW Individual paint finishes are set apart from standard exterior colours by their iridescent surface and exceptional brilliance.

BMW Individual leather Merino stands out by not requiring any surface treatment. So the surface retains its natural appeal, making it more exclusive, softer and more comfortable.

BMW Individual wood trims are distinguished from standard trims by their special grain and colouration. Their high quality is due to stringent selection - only the best pieces are used.

BMW Individual Infotainment systems. Rear Seat Infotainment Online and the new High-End Audio System are BMW Individual innovations which set new standards in automotive entertainment electronics.

Treble

## The secret of our colours lies in the

**pigmentation.** When you look at one of our paint finishes, you will see a whole rainbow of colours, which is caused by the interplay of various pigments. Depending on how the light falls onto the paintwork, they create a multitude of different hues. This adds some glorious depth to the surface. BMW uses different types of pigments. depending on the final colour, and is one of the first manufacturers to work with Xirallic® pigments. This is a special type of pigment which allows for very strong reflection, bringing an additional dimension of sparkle to the final paint finish. The colours appear more intense and brilliant. Xirallic® is not used for standard production cars. These pigments are reserved for our Ruby Black metallic and Azurite Black metallic paint finishes.

Titanium dioxide is a pigment which gives lighter coloured paint finishes their unmistakable shimmer. Its ultra high refractivity is only surpassed by that of diamond. Titanium dioxide is used in our Moonstone metallic and Aventurine Silver metallic paint finishes. In Moonstone metallic, it creates a perfect shimmering effect which alternates between bluish and golden yellow.

Variochrome® is another pigment which. depending on the viewing angle, causes a multitude of hues to appear underneath the surface. A little light is enough to bring out the scintillating brightness of these pigments. Another of their characteristics is the so-called flop effect, which gives our Diamond metallic paint finish its exclusive, gem-like shimmer in a process exclusively used by BMW Individual.

## Each BMW Individual colour is unique. So is the sheer variety of our colours. In addition to the BMW Individual paint finishes already mentioned, which include Azurite

Black metallic, Ruby Black metallic, Diamond metallic and Moonstone metallic, we offer a number of other colours with elegant iridescent effects.

One example is our Opal Black metallic paint finish, which, depending on the viewing angle, appears in a variety of hues from dark blue to teal

The dark blue Blue Onyx metallic paint finish makes a strong statement by virtue of its black pigments. The pigments in this paint finish are larger, which makes for an elegant mirror-like effect.

The larger pigments used in the Diopside Black metallic finish create a three-dimensional contouring effect.

Malachite Green dark metallic scintillates in a seemingly endless number of green hues, reminiscent of the malachite gemstone.

The pigments in our Midnight Blue metallic finish create an iridescent effect with a multitude of dark blue hues.

Did you know that each BMW Individual paint finish is applied in five layers to the surface of the car? The first three layers, albeit not visible in the finished product, play a crucial role. Their job is to cleanse and prime the surface, to improve adhesion and protect against corrosion. A hydro filler protects against stone chip damage. Only the fourth laver contains the pigments and gives the colour effect. The fifth layer gives our paint finishes its unmatched shine and acts as a protective coating against scratches.

### Greater comfort thanks to soft surfaces and open-pore texture. Our BMW Individual

Merino leather is saturated in pigments during a special vat immersion process which makes the leather soak up the colour. This process allows us to do away with additional treatments where colour layers are applied to the surface of the leather. Dving the surface with chemicals – a common practice with other types of leather – is not necessary. And since our Merino leather can do very well without these secondary treatments, it remains soft and supple.

Another distinguishing characteristic that sets our leather apart is one you can feel with your hands: thanks to not over-treating it, our Merino leather retains its porous structure. Which means it can be compared to a breathable fabric in that it absorbs body

Did you know that the exclusivity of the BMW Individual Merino leather already starts with the painstaking selection of the right raw materials? The reason: our Merino leather retains its natural grain. We do not believe in embossing patterns onto the leather in rolling machines. Working with the natural qualities of the leather means that we can only use immaculate skins that are free from damage and blemishes. This makes for a very strict selection process.

The BMW Individual leather steering wheel with wood ring insert is mostly made by hand. It is based on the BMW sports increase in comfort is documented beyond leather steering wheel, whose rim is covered a shadow of a doubt by the thermal imaging in Walknappa leather. Combining the highquality leather and the inlaid wood ring takes great skill. The steering wheel bears the "BMW Individual" designation.

The infrared camera shows the difference: to the left, Merino leather with BMW Individual SunReflective Technology, which stays considerably cooler in direct sunlight.

### **BMW Individual SunReflective** Technology for enhanced comfort in a convertible. BMW Individual SunReflective

Technology is an innovation for convertible drivers which was developed especially for BMW Individual Merino leather and is used in the BMW Individual 3 Series and 6 Series Convertibles. We treat the leather with a special pigmentation which ensures that sunlight, instead of being absorbed, is reflected. The benefit: while leather usually heats up in sunlight, our SunReflective Technology can achieve a temperature reduction of up to 25 °C. This significant camera.

It does not in any way interfere with the aesthetics of the Merino leather, which retains all the natural, visual and structural characteristics that make it so special in the first place.

BMW Individual wood trims are handpicked. Obviously, only a small number of wood pieces can live up to the expectations of our craftspeople. This is all about selecting the perfect grain. All woods have been treated in an environmentally friendly manner. Depending on the type of wood, however. there are subtle differences:

To guarantee a consistent look, the decorative panels in Mahogany Maritime are all made from the same trunk. The Sapele wood is neither bleached nor stained, and has in fact not been submitted to any kind of chemical treatment. Adorning the surfaces with wood inlays requires great craftsmanship. Especially when you need to ensure that the interior trim can hold its own in crash, climate change and sun simulation tests.

For our Walnut Amarone finish, we use trunk wood to ensure that the linear structure of the wood is retained, creating an interesting contrast.

The trims in Poplar Natural and Birch Anthracite are classic grain woods. Their main characteristic is their flamed structure.

An alternative to fine woods is our Piano Finish Black, Here, we are using traditional piano manufacture techniques to create a high-gloss surface.

Mid-range

Treble speaker Hexacone membrane Neodymium magnet driver

### The loudspeaker configuration is perfectly matched to the interior.

The loudspeaker array for the front consists of two treble/mid-range combos, and the coaxial centre speaker. This creates ideal acoustics. The occupants feel transported into a concert hall, with the stage in front of them.

The aural horizon is exactly at head height. Through delay equalisation and control adjustments in the cockpit and rear, sound is broadcast in such a way that it is perceived exactly at ear height throughout the entire car.

### A High-End Audio System that is precisely matched to your car. The

interior of a car has very different acoustic parameters than a living room. In order to simulate an acoustic experience that rivals that of a concert hall, you need the kind of competence that even some top-class manufacturers lack. The reason why our High-End Audio System makes the grade lies in its unique signal processing. DIRAC is a technology not used by any other manufacturer. It creates an unmatched listening experience by reducing the numerous time-delayed sound reflections in the car's interior. The result: unmatched impulse response and optimum sound quality on all seats. Another advantage is provided by the speed-dependent equalising. Driving noises are compensated by an increase in volume on the one hand and a relative correction of the frequency response on the other.

The loudspeaker configuration is perfectly matched to the interior. This ensures optimum audio playback. Great care has been taken in matching the high-performance loudspeakers to the vehicle. The sound emission characteristics perfectly match the geometry of the interior (see illustration on the left).

And the 16 high-performance loudspeakers have been optimised for in-vehicle use: they feature power-boosted neodymium magnet drivers and extremely stiff and lightweight Hexacone® membranes. The benefit: the powerful drivers and ultrahard membranes lead to faster impulse response times, improving speaker efficiency, Identical membrane technology for all loudspeakers also ensures superior bass and mid-range playback. The BMW Individual High-End Audio System is operated via the iDrive controller.

### BMW Individual Rear Seat Infotainment

**Online** is the entertainment system for rear-seat passengers. It consists of two 9.5-inch LCD monitors integrated into the front seat backrests. The system allows passengers to send and receive e-mails and to enjoy unrestricted Internet access while on the road. They can also just sit back and watch TV or DVDs. Further functions include the display of digital photos and e-mail attachments via a viewer program as well as access to various storage media.

This system is operated via a separate controller in the rear. A wireless Bluetooth keyboard enables passengers to access and edit their e-mails as well as surf the Internet.

BMW Individual Rear Seat Infotainment Online is controlled via the Car Infotainment Computer which is tucked away in the luggage compartment. Audio playback via the car's sound system ensures a perfect listening experience.
