

BMW M3 Chassis Code E92 2007 -

Part No BMSMI40

## Road&Track by Öhlins

*This is the latest step in the Öhlins Racing automotive philosophy – Road&Track by Öhlins.*

*A more than 30 year long tradition of high-end racing commitments and state-of-the-art solutions within advanced suspension technology is now available for street cars all over the world.*

*The focus has been clear from the very beginning – superior road handling without sacrificing comfort in your day-to-day transports. The time of compromises are over!*

We have also added a clever light-weight design with a majority of the parts in aluminium and on top of that all shocks have suffered through vast corrosion tests according to ISO 9227. The end result is a 2-year limited warranty on all of our products - worldwide.

**Please Note!** If the car is originally equipped with EDC the Öhlins EDC cancellation, kit part.no 35020-01, is also needed. This solves the problem of warning light on the dashboard when disconnecting the original EDC shock.

**DFV**

### General Features

- DFV (Dual Flow Valve)
- Rebuildable
- Corrosion salt spray tested (ISO 9227)
- 2 year Limited Warranty
