Tire Repair Kit

Stay On The Road With Our Complete Tire Repair Kit

Like everything else we offer, this is "fully tested". There is no more than taking the time to drive to a tire repair shop and watching flat, when I know I could do it myself in a tenth the time. It's easy: pull out the nail or screw with the pliers, take the reaming tool and put a little lube on the tip to clean out the hole. Then take the end-slot needle with a plug attached and, voilà! Add some lube and you're heading down the road faster than you can say, "What an awesome kit includes pliers, a marking crayon (so you can act like the pro), a reamer, a utility knife to cut off the excess plug, reamer needle, and 25 plugs. All this comes organized in our Water-F Bag. Purchase one for every car and put it in your trunk today the next time you have a flat tire. Available with or without an Air Compressor.

Item#	Product	Quantity
36845	Tire Repair Kit Without Air Compressor In Stock	<input type="text" value="0"/>
36890	Tire Repair Kit With 12 Volt Air Compressor In Stock	<input type="text" value="0"/>
