

THE SHORTEST DISTANCE BETWEEN POINT A AND POINT B DIDN'T EXIST LAST YEAR.

Millions of miles of charted roads. Millions of searchable Points of Interest, from necessities like gas, food and lodging to attractions like museums, amusement parks and shopping malls. The convenience of BMW's Digital Road Map for North America allows you more time to enjoy the road and less time worrying about finding your way.

The BMW On-Board Navigation System, with maps by TomTom, gives you precise, turn-by-turn directions, easy-to-read road depictions and a wealth of information at the touch of a button. BMW map updates bring drivers the most accurate roads, addresses, and Points of Interest by utilizing a diverse network of reporting sources—from satellite and aerial imagery to government sources and a growing system of verified input from millions of drivers.

Plan your route by the shortest distance or take the scenic route. It's your road, your choice.

Why Updating Your Map is Important.

Road networks change fast—on average up to 15 percent per year. To get the most out of your BMW Navigation System, BMW recommends updating your maps regularly.

For more information about purchasing a map update for your factory installed BMW Navigation System, please visit your local BMW Center or call 1-866-543-6848 or visit <http://store.bmwgpsmaps.com>

If your vehicle production date is before September of 2009, please contact your local BMW Center for additional product information.
